Cyber Talent Ethiopia 2025 Registration Form

This form helps us understand your background, skills, and aspirations. Please answer the following questions thoughtfully, providing specific examples where possible. Each response should be 150–300 words unless otherwise stated. Submit your responses in a single document to [This Link](#)

Warning AI-generated content is strictly prohibited and will result in disqualification

Past Projects

Describe 1–2 significant projects you have worked on, related to cybersecurity, software development, embedded systems, aerospace, or other technical fields. Highlight your role, technologies used, challenges faced, and outcomes achieved. (Example: A cybersecurity project securing a web application or an embedded system for IoT.)

1. Mostly i work on Backend Systems Using Django created API the project is called Do it yourself a functionality that can make a user analyze how anything can be done step by step.

The thing i faced is i needed to have Authentication using Django Restframework i had to make it work while reading and implementing it by trial and error method.

2. Smart Parking System used [Express.js](#) and mysql the point for this project is any driver can book a parking space whenever he is and get he's space save and reserved and this project is on process because it was a side project.

Hackathons and Competitions

List any hackathons, coding competitions, or technical challenges you have participated in. Include the event name, date, your contributions, and any achievements (e.g., awards, rankings). If you haven't participated, describe how you've engaged with technical communities or self-driven challenges.

1. My first hackathon was at Bits College and it was in October 12-14 two day project competition and i contributed the backend systems using spring boot.
2. Alx's first ever Hospitality Hackathon at alx and Kuriftu and We ventures on april 12-13 2025, altogether and we managed to secure top 8teams places out of 70 teams and it was a smart feedback response system and i was the Project Manager using SCRUM Technique d

Current Courses or Training

Detail any courses, certifications, or training programs you are currently enrolled in or recently completed. Specify the subject area (e.g., penetration testing, cloud computing) and platform (e.g., Coursera, TryHackMe...). Explain how these align with your career goals.

The Following are Finished Courses and Certifications i recived

1. ALX Backend Web Development(ALX)Course and Certificate
2. Ethickal Hacking Mastering Network Vulnerability(Udemy)Certificate
3. Spring Boot Course
4. Fundamentals of Programming(Ethiopian Government and Udemy)
5. Technical Support fundamental(Google and Coursera)

The Followings are currently taking courses

1. AWS Cloud Computing (from aws educate)
2. AI Training Kifiya Mastery
